

Program to Calculate Net Salary

```
#include<iostream>
using namespace std;
int main()
{
    float basic;
    float percentAllow;
    float percentDeduct;
    float netSalary;

    cout<<"Enter Basic Salary:";
    cin>>basic;
    cout<<"Enter percent of Allowences:";
    cin>>percentAllow;
    cout<<"Enter percent of Deductions:";
    cin>>percentDeduct;

    netSalary=basic+basic*percentAllow/100-
    basic*percentDeduct/100;

    cout<<"Net Salary is:"<<netSalary<<endl;
}
```
